

Digital Underwriting and InsurTech Innovations

COURSE OVERVIEW

This course offers a practical approach to understanding the technological advancements reshaping insurance underwriting. It examines how AI, automation, big data, and blockchain technologies accelerate and enhance underwriting accuracy, while boosting customer satisfaction and operational productivity. Participants will explore cutting-edge InsurTech solutions such as digital platforms, automated risk evaluation, and predictive analytics, alongside key topics like compliance, ethics, and regulatory frameworks within the dynamic insurance landscape.

WHO SHOULD ATTEND?

This course is designed for underwriters, insurance professionals, product managers, risk analysts, actuaries, and InsurTech consultants. It is equally valuable for insurance executives, technology leaders, and compliance officers seeking to leverage digital innovation to modernize underwriting, reduce risk exposure, and create customer-centric insurance solutions.

COURSE OUTCOMES

Delegates will gain the skills and knowledge to:

- Understand the role of digital technologies in transforming underwriting.
- Apply AI, big data, and automation to streamline underwriting workflows.
- Analyze InsurTech driven business models.
- Evaluate emerging InsurTech platforms and innovations.
- Integrate digital underwriting solutions while maintaining compliance and ethics.
- Develop strategies for enhancing risk assessment and customer experience.

KEY COURSE HIGHLIGHTS

At the end of the course, you will understand;

- End-to-end exploration of digital underwriting transformation.
- Risk assessment through AI and machine learning.
- Compliance, ethics and regulatory frameworks in AI underwriting.
- Practical demonstrations of AI-driven risk assessment and decision engines.
- Insights into blockchain and digital platforms in underwriting.
- Case studies on InsurTech adoption across global insurance firms.

All our courses are dual-certificate courses. At the end of the training, the delegates will receive two certificates.

1. A GTC end-of-course certificate.
2. Continuing Professional Development (CPD) Certificate of completion with earned credits awarded.
