

## Environmental Impact Assessment & ESG Compliance in Oil & Gas Projects

### COURSE OVERVIEW

This fundamental course provides participants with a practical and extensive understanding of how to evaluate, mitigate and manage environmental and social risks associated with oil and gas operations. It explores the principles, processes and methodologies of EIA, while also addressing the growing importance of Environmental, Social and Governance (ESG) standards in regulatory compliance, stakeholder engagement and sustainable project development. Through case studies and interactive discussions, participants will gain the skills to integrate sustainability considerations into project planning, execution, and reporting.

### WHO SHOULD ATTEND?

This course is designed for oil and gas professionals including HSE managers, project engineers, compliance officers, environmental consultants, regulators and corporate sustainability officers. It is also critical for senior executives and decision makers who are responsible for ensuring projects align with international ESG benchmarks and local regulatory requirements.

### COURSE OUTCOMES

Delegates will gain the skills and knowledge to:

- Understand the concepts, processes, and regulatory frameworks of Environmental Impact Assessment.
- Apply ESG principles to project development and operational decision-making in oil and gas projects.
- Identify, assess, and mitigate potential environmental and social risks.
- Strengthen stakeholder engagement and communication strategies.
- Develop compliance strategies aligned with national and international standards.
- Use monitoring and reporting systems to track ESG performance and drive improvement.

### KEY COURSE HIGHLIGHTS

At the end of the course, you will understand;

- The environmental impact assessment (EIA) process specific to oil and gas projects.
- Techniques to identify, predict, and mitigate ecological and social impacts.
- Regulatory requirements and global standards for ESG compliance in the energy sector.
- The importance of stakeholder engagement and transparent reporting.
- Strategies for monitoring, auditing, and continuous improvement in environmental performance.
- How to integrate sustainability goals with project planning and execution.

All our courses are dual-certificate courses. At the end of the training, the delegates will receive two certificates.

1. A GTC end-of-course certificate
2. Continuing Professional Development (CPD) Certificate of completion with earned credits awarded
