

International Standards, Governance, and Digital Compliance in Healthcare

COURSE OVERVIEW

This course offers a comprehensive exploration of global regulatory frameworks, data protection laws, and governance practices shaping the modern healthcare ecosystem. The course bridges the gap between policy, ethics, and technology, equipping participants to develop effective governance strategies, mitigate compliance risks and ensure adherence to global best practices in digital health management. Participants will gain insights into international standards such as ISO, WHO, and GDPR regulations, while understanding how digital transformation and emerging technologies impact healthcare compliance.

WHO SHOULD ATTEND?

This course is designed for healthcare administrators, compliance officers, IT and data security professionals, regulatory affairs specialists, policymakers, and healthcare providers involved in managing digital systems and ensuring regulatory alignment. It is also ideal for professionals seeking to enhance their understanding of healthcare governance and international compliance frameworks.

COURSE OUTCOMES

Delegates will gain the skills and knowledge to:

- Interpret and apply key international healthcare standards and compliance requirements.
- Develop governance frameworks aligned with global best practices.
- Identify and manage digital compliance risks in healthcare systems.
- Integrate ethical and regulatory principles into digital health initiatives.
- Strengthen institutional accountability and data protection strategies.
- Implement continuous monitoring and auditing mechanisms to sustain regulatory compliance.

KEY COURSE HIGHLIGHTS

At the end of the course, you will understand;

- Key international healthcare standards like ISO and Joint Commission International.
- Frameworks for governance and regulatory compliance in healthcare.
- How to implement digital compliance programs across health systems.
- The role of accreditation in improving healthcare quality and safety.
- Methods to monitor and audit compliance in digital healthcare environments.
- Best practices for continuous improvement aligned with global standards.

All our courses are dual-certificate courses. At the end of the training, the delegates will receive two certificates.

1. A GTC end-of-course certificate
2. Continuing Professional Development (CPD) Certificate of completion with earned credits awarded
