

# Sustainable Development and Green Finance in Oil and Gas

## COURSE OVERVIEW

This course explores the critical link between sustainable development principles and financial mechanisms within the oil and gas industry. As the global energy landscape transitions toward sustainability, this course provides industry professionals with the knowledge and practical skills to adopt sustainable practices and utilize green finance strategies effectively. Participants will learn about the environmental, social, and governance (ESG) frameworks that influence decision-making in oil and gas, as well as the financial instruments that support sustainable investments and projects.

## WHO SHOULD ATTEND?

This course is designed for oil and gas industry professionals looking to integrate sustainable practices and green finance into their operations. It also targets energy consultants, sustainability managers, and ESG professionals focused on implementing environmental, social, and governance strategies. Investment professionals, financial advisors, and policy makers interested in supporting sustainable investments and shaping energy sector sustainability will benefit from the course, as well as academics, researchers, and students exploring the intersection of sustainable development and green finance.

## COURSE OUTCOMES

Delegates will gain knowledge and skills to:

- Understand sustainable development principles and their relevance to oil and gas.
- Identify and evaluate ESG factors for informed decision-making.
- Learn about green finance instruments like green bonds and ESG funds.
- Develop strategies to integrate sustainable practices into operations and projects.
- Understand regulatory frameworks and compliance requirements for sustainability.
- Measure and report sustainability impact using recognized frameworks.
- Stay informed on emerging trends and opportunities in sustainability and green finance.

## KEY COURSE HIGHLIGHTS

At the end of the course, you will understand:

- Sustainable development principles in oil and gas
- ESG factors and their impact on decision-making
- Green finance instruments (green bonds, ESG funds)
- Strategies for integrating sustainability into operations and projects
- Regulatory frameworks and compliance requirements for sustainability
- Measuring and reporting sustainability impact
- Emerging trends and opportunities in sustainability and green finance

All our courses are dual-certificate courses. At the end of the training, the delegates will receive two certificates.

1. A GTC end-of-course certificate
2. Continuing Professional Development (CPD) Certificate of completion with earned credits awarded
