

Certified Cloud Security Professional (CCSP)

COURSE OVERVIEW

The Certified Cloud Security Professional (CCSP) course prepares IT and security professionals to design, manage, and secure cloud environments. It covers key cloud security concepts, architecture, governance, risk management, data protection, and compliance. Participants learn best practices for securing cloud infrastructure and services, making them ready to tackle cloud security challenges and earn the globally recognized CCSP certification. CCSP study guide covers the CCSP exam objectives and offers hands-on learning experience in topics such as Data Classification, Cloud Data Security, Cloud Application Security, Operations Management, and many more.

WHO SHOULD ATTEND?

The Certified Cloud Security Professional (CCSP) course is ideal for cloud security professionals, IT security managers, and architects who design and manage secure cloud environments. It suits cloud architects and engineers responsible for implementing cloud security solutions, as well as security consultants and auditors assessing cloud risks and compliance. IT professionals involved in cloud security operations, along with compliance and risk management officers ensuring regulatory adherence, will also benefit from this course. This program equips participants with the skills to protect cloud data, manage cloud governance, and address security challenges in diverse cloud models.

COURSE OUTCOMES

Delegates will gain the skills and knowledge to:

- Understand cloud computing concepts and architecture.
- Apply best practices for cloud security.
- Manage cloud data security and privacy.
- Implement cloud infrastructure security controls.
- Assess and manage cloud risks and compliance.
- Prepare effectively for the CCSP certification exam.

KEY COURSE HIGHLIGHTS

At the end of the course, you will understand;

- Cloud security concepts and architecture.
- Risk management and compliance.
- Data protection and privacy.
- Cloud infrastructure security.
- How to prepares for the CCSP certification exam.
- Best practices and real-world scenarios.

All our courses are dual-certificate courses. At the end of the training, the delegates will receive two certificates.

1. A GTC end-of-course certificate
2. Continuing Professional Development (CPD) Certificate of completion with earned credits awarded
