Certified Information Systems Auditor (CISA)

COURSE OVERVIEW

This course is designed to help candidates prepare for sitting the ISACA CISA certification examination. By taking this course and obtaining CISA certification, your experience and skills in auditing and securing the organization's information systems will be validated. Securing the organization's information is a critical business objective in today's business environment. The information that an organization depends on to be successful can be at risk from numerous sources. By effectively managing audit processes, controls, and other security aspects of the business, you will greatly contribute to the overall security of the organization.

WHO SHOULD ATTEND?

The intended audience for this course is information security and IT professionals, particularly internal auditors, who are interested in earning the CISA certification. The course is also applicable to individuals who are interested in learning about information security audits, controls, and security.
