

# EC-Council Certified Secure Computer User (CCSCU)

# **COURSE OVERVIEW**

The CCSCU program teaches individuals how to protect their information assets by covering computer and network security threats like identity theft, credit card fraud, phishing scams, viruses, hacking, and social engineering. It equips students with practical skills to mitigate security risks. The course prepares individuals for the CCSCU exam 112-12 and complements security and networking education.

### WHO SHOULD ATTEND?

This course is ideal for individuals who want to improve their personal and professional security awareness, computer users looking to protect their devices and data from security threats, employees and professionals needing to understand and apply best practices in information security, and anyone seeking to enhance their cybersecurity knowledge and skills for everyday use. It is also suitable for individuals interested in pursuing a career in cybersecurity or data protection.

### **COURSE OUTCOMES**

Delegates will gain the skills and knowledge to;

- Understand the importance of computer security and best practices
- Identify common security threats and vulnerabilities
- Implement secure practices for email, browsing, and social networking
- Protect personal data and ensuring privacy online
- Apply encryption techniques for securing sensitive information
- Recognize the importance of maintaining secure passwords and authentication methods
- Gain the skills to secure personal and professional devices against cyber threats.

# **KEY COURSE HIGHLIGHTS**

At the end of the course, you will understand;

- The basics of computer security and why it matters.
- Common security threats and vulnerabilities, and protecting it.
- How to secure your personal and professional data through encryption.
- Applying secure practices for email, web browsing, and social media.
- Protecting sensitive information by using strong passwords and authentication.
- How to safeguard online privacy and secure personal devices.
- Practical skills for securing digital communications and networks.

All our courses are dual-certificate courses. At the end of the training, the delegates will receive two certificates. 1. A GTC end-of-course certificate

2. Continuing Professional Development (CPD) Certificate of completion with earned credits awarded
