

ISO 31000 Foundation

COURSE OVERVIEW

The ISO 31000 Foundation course covers the basic principles, terms, and approaches of risk management based on ISO 31000, focusing on its key components: principles, framework, and process. Each step of the risk management process is clearly explained. After the course, you can take the exam and apply for the “PECB Certificate Holder in ISO 31000 Foundation” to validate your understanding of core risk management concepts and methods.

WHO SHOULD ATTEND?

This course is suitable for individuals involved in risk management, those seeking to understand the principles, framework, and process of risk management, professionals responsible for managing risks and opportunities within their areas, and anyone interested in pursuing a career in risk management.

COURSE OUTCOMES

Delegates will gain the skills and knowledge to:

- Summarize the main concepts and principles of risk management as articulated in ISO 31000.
- Explain the ISO 31000 guidelines for establishing the risk management framework.
- Describe the application of the risk management process in accordance with ISO 31000 guidelines.

KEY COURSE HIGHLIGHTS

At the end of the course, you will understand;

- Overview of ISO 31000 principles and guidelines.
- Key risk management terms and definitions.
- Introduction to the risk management framework.
- Detailed explanation of the risk management process.
- Step-by-step analysis of each phase in the process.
- Practical approaches for identifying and managing risks and opportunities.
- Preparation for the ISO 31000 Foundation certification exam.
- Recognition of fundamental risk management knowledge through PECB certification.

All our courses are dual-certificate courses. At the end of the training, the delegates will receive two certificates.

1. A GTC end-of-course certificate
2. Continuing Professional Development (CPD) Certificate of completion with earned credits awarded
