ISO 45001 Lead Implementer – Occupational Health and Safety Management System

COURSE OVERVIEW

The ISO 45001 Lead Implementer is a five-day course designed to equip you with the skills to establish, implement, manage, and maintain an occupational health and safety management system (OH&S MS) in line with ISO 45001:2018. It covers key requirements, best practices, and approaches for effective implementation and maintenance of an OH&S MS, with the goal of fostering a safer workplace. After completing the course, you'll take a certification exam. Successful candidates can apply for the IAS-accredited "PECB Certified ISO 45001 Lead Implementer" credential, which confirms your ability to implement an OH&S MS based on ISO 45001 standards.

WHO SHOULD ATTEND?

The ISO 45001 Lead Implementer training course is intended for individuals responsible for maintaining and improving workplace safety, including occupational health and safety officers, consultants, and advisors. It is also suitable for professionals seeking to understand PECB's IMS2 Methodology for implementing an OH&S management system, those tasked with ensuring conformity to ISO 45001 requirements, members of OH&S teams, and individuals aiming to build a career as OH&S MS implementers, consultants, or officers.

COURSE OUTCOMES

Delegates will gain the skills and knowledge to:

- Explain the fundamental concepts and principles of an occupational health and safety management system (OH&S MS) based on ISO 45001
- Interpret the ISO 45001 requirements for an OH&S MS from the perspective of an implementer
- Initiate and plan the implementation of an OH&S MS based on ISO 45001, by utilizing PECB's IMS2 Methodology and other best practices
- Support an organization in operating, maintaining, and continually improving an OH&S MS based on ISO 45001
- Prepare an organization to undergo a third-party certification audit

KEY COURSE HIGHLIGHTS

At the end of the course, you will understand:

- ISO 45001:2018 requirements and implementation guidelines
- How to establish, manage, and maintain an OH&S Management System
- How to apply best practices for risk identification, operational control, and worker safety
- Engaging practical tools to improve workplace health and safety performance
- How to prepare for the "PECB Certified ISO 45001 Lead Implementer" certification exam
- Validating your competence with an internationally recognized credential

All our courses are dual-certificate courses. At the end of the training, the delegates will receive two certificates.
1. A GTC end-of-course certificate
2. Continuing Professional Development (CPD) Certificate of completion with earned credits awarded
