

SAC01- Introduction to SAP Analytics Cloud

COURSE OVERVIEW

The SAC01 course offers an introduction to SAP Analytics Cloud (SAC). It covers core features in business intelligence, planning, and predictive analytics. Participants will learn data connectivity, model creation, story building, and collaboration tools. The course also introduces applications that interface with SAC and its integration with other SAP solutions. It includes concept overviews and hands-on demos, making it ideal for users new to SAP Analytics Cloud.

WHO SHOULD ATTEND?

This course is ideal for business analysts, data analysts, reporting specialists, SAP functional consultants, and new users of SAP Analytics Cloud who want to understand its core capabilities and how to create data-driven insights through planning, analysis, and reporting.

COURSE OUTCOMES

Delegates will gain the skills and knowledge to:

- Provide a high-level introduction and overview of SAP Analytics Cloud (SAC) capabilities as well as applications that interface with SAC.
- Demonstrate hands-on exercises or simulations through exposure to data connections, stories, data analyzer, analytic applications, microsoft office integration, modelling basics, planning basics, augmented analytics, collaboration, and administration basics.

KEY COURSE HIGHLIGHTS

At the end of the course, you will understand;

- Overview of SAP Analytics Cloud.
- Business intelligence features.
- Planning and forecasting tools.
- Predictive analytics basics.
- Data connectivity options.
- Model creation techniques.
- Story building and visualization.
- Collaboration and sharing tools.
- Integration with SAP applications.
