

Advanced Financial Modelling and Cloud-Based Accounting Solutions

COURSE OVERVIEW

Advanced Financial Modelling and Cloud-Based Accounting Solutions is an expert-level course that is focused on building robust, flexible financial models and utilizing cloud accounting platforms to streamline financial analysis, forecasting, and strategic business decision-making. This course blends advanced Excel techniques, scenario analysis, and integration of cloud technologies to provide up-to-date skills for participants to enhance data-driven finance professionalism in today's digital landscape.

WHO SHOULD ATTEND?

This course is designed for finance professionals, accountants, financial analysts, auditors, consultants, and business managers who have a solid foundation in financial modelling and seek to further enhance their expertise in advanced modelling skills, and leverage modern cloud-based accounting tools for superior financial management.

COURSE OUTCOMES

Delegates will gain the skills and knowledge to:

- Design and construct complex financial models for comprehensive business analysis.
- Apply scenario analysis, debt scheduling, and valuation techniques.
- Integrate and automate financial reporting using cloud-based solutions.
- Enhance decision-making through real-time financial data and analytics.
- Adopt best practices in model validation and presentation.
- Assess the scalability and adaptability of financial models for various business scenarios.
- Ensure compliance with international accounting standards and strengthen audit readiness.

KEY COURSE HIGHLIGHTS

At the end of the course, you will understand;

- Advanced Excel and VBA tools for financial modelling.
- Techniques for building dynamic, multi-scenario financial models.
- Integration of cloud accounting solutions such as Xero or QuickBooks.
- Automation of reporting and real-time collaboration features.
- Applied case studies using live business data.
- Modelling for debt, capital structure, and tax planning.
- Consolidation methods for complex business entities.
- Data security and risk mitigation in cloud environments.
- Workflow optimization for finance teams.
- Emerging trends in digital finance transformation.

All our courses are dual-certificate courses. At the end of the training, the delegates will receive two certificates.

1. A GTC end-of-course certificate
2. Continuing Professional Development (CPD) Certificate of completion with earned credits awarded
