

# Carbon Markets, Climate Finance, and Green Bond Mechanisms

## COURSE OVERVIEW

This course offers an in-depth understanding of financial instruments and market-based solutions essential for addressing climate change. It covers the structure and functioning of carbon credit markets, principles of sustainable finance, and the lifecycle of green bonds, equipping participants with the required tools to facilitate financing for low-carbon projects, ensure regulatory compliance, and support the transition to a sustainable economy.

## WHO SHOULD ATTEND?

Strongly related to finance, the course is designed for finance professionals, investment managers, sustainability officers, corporate strategists, government policymakers, regulators, environmental consultants, NGOs, and anyone involved in climate-related financial planning or green investment initiatives seeking to deepen their expertise in carbon markets and sustainable finance mechanisms.
