

AI-Powered Supply Chain Financing and Dynamic Discounting

COURSE OVERVIEW

This course provides a comprehensive exploration of how artificial intelligence is revolutionizing supply chain financing and dynamic discounting, enabling organizations to optimize working capital, strengthen supplier relationships, and unlock new value across the procure-to-pay lifecycle. Participants will learn how AI-driven platforms analyze financial data, predict buyer-supplier behavior, and automate discounting decisions in real-time. Through practical applications, the course demonstrates how to deploy intelligent financing solutions that improve cash flow, reduce supply chain risk, and create a more resilient and collaborative financial ecosystem.

WHO SHOULD ATTEND?

This program is designed for finance professionals, treasury managers, procurement leaders, supply chain directors, and technology innovators who are involved in working capital optimization and supplier relationship management. It is particularly valuable for professionals in banking, fintech, manufacturing, and retail sectors who seek to leverage AI for financial innovation. The content is tailored for both financial experts and operational managers looking to integrate intelligent financing solutions into their supply chain strategies.

COURSE OUTCOMES

Delegates will gain the skills and knowledge to:

- Evaluate AI-powered financing solutions for supply chain optimization.
- Implement dynamic discounting strategies using predictive analytics.
- Leverage AI to assess supplier financial health and mitigate risk.
- Automate working capital management through intelligent platforms.
- Design buyer-supplier financing programs that strengthen partnerships.
- Integrate AI-driven financing with existing ERP and procurement systems.
- Measure ROI and performance metrics for supply chain financing initiatives.

KEY COURSE HIGHLIGHTS

At the end of the course, you will understand;

- How machine learning transforms traditional supply chain financing approaches.
- The use of AI to optimize dynamic discounting timing and terms.
- Methods for leveraging AI to evaluate financial stability and payment behaviors.
- Techniques for intelligent working capital management.
- Strategies for connecting AI-financing solutions with existing financial systems.
- Best practices for deploying successful supplier financing initiatives.
- Key metrics and ROI calculations for AI-powered financing programs.

All our courses are dual-certificate courses. At the end of the training, the delegates will receive two certificates.

1. A GTC end-of-course certificate
2. Continuing Professional Development (CPD) Certificate of completion with earned credits awarded
