

AI and Legal Tech in Project Contracting and Compliance

COURSE OVERVIEW

This course as a blend of AI & legal management examines how artificial intelligence and digital legal technologies are reshaping contract management, compliance monitoring, and risk mitigation in project environments. From contract drafting and automated review to predictive compliance analytics and smart contract applications, AI-driven tools enhance efficiency, accuracy, and transparency. Participants will be equipped with practical knowledge, frameworks, and case studies to leverage AI and legal tech for streamlined contracting, stronger compliance, and better governance in complex projects.

WHO SHOULD ATTEND?

This course is designed for project leaders, contract managers, legal advisors, compliance officers, and procurement professionals seeking to integrate AI and technology into project governance and contracting processes. It is particularly valuable for professionals in construction, energy, infrastructure, and technology sectors, where contractual risks and compliance obligations are high. Consultants, policymakers, and executives responsible for legal innovation, governance, and digital transformation will also benefit from understanding the opportunities and risks of AI and legal tech in project environments.

COURSE OUTCOMES

Delegates will gain the skills and knowledge to:

- Understand the role of AI and legal technology in project contracting and compliance management.
- Utilize AI tools to streamline contract drafting, review, and administration.
- Apply predictive analytics to detect compliance risks and potential breaches.
- Implement smart contracts to automate project-related transactions.
- Enhance governance through technology-driven monitoring and oversight.
- Assess ethical, legal, and data privacy issues related to AI adoption.
- Leverage AI-generated legal insights to support better decision-making.
- Analyze global case studies demonstrating the use of AI and legal tech in successful project delivery.

KEY COURSE HIGHLIGHTS

At the end of the course, you will understand;

- Fundamental AI and legal technology applications in project management settings.
- Tools for automated contract creation, review, and detailed analysis.
- Predictive analytics techniques for managing compliance and mitigating risk.
- Integration and use of smart contracts during project execution.
- Methods for digital compliance monitoring and governance enhancement.
- Ethical, regulatory, and data privacy considerations surrounding AI in legal workflows.
- Strategies to boost efficiency and transparency using AI technologies.
- Real-world case studies of organizations implementing legal tech in project environments.

All our courses are dual-certificate courses. At the end of the training, the delegates will receive two certificates.

1. A GTC end-of-course certificate
2. Continuing Professional Development (CPD) Certificate of completion with earned credits awarded
