

ESG Performance Analytics and Reporting for the Oil & Gas Sector

COURSE OVERVIEW

This course delves into an advanced understanding of Environmental, Social, and Governance (ESG) performance analytics and reporting within the oil and gas sector. It equips participants with the knowledge and tools to assess ESG risks and opportunities, apply global reporting standards, and leverage analytics to track sustainability performance. Through industry-specific case studies and practical frameworks, participants will gain insights into aligning ESG strategies with regulatory requirements, stakeholder expectations, and long-term business resilience in an evolving energy landscape.

WHO SHOULD ATTEND?

The course is designed for professionals in the oil and gas industry, including sustainability managers, ESG analysts, operations and compliance officers, HSE specialists, corporate reporting teams, and financial analysts. It is also valuable for consultants, regulators, and investors seeking to deepen their understanding of ESG data integration, reporting, and performance benchmarking within the sector.

COURSE OUTCOMES

Delegates will gain the skills and knowledge to:

- Develop a clear understanding of ESG frameworks, metrics, and standards relevant to oil and gas.
- Learn to design and implement ESG data collection, analysis, and reporting systems.
- Gain practical skills in using analytics tools to monitor and evaluate ESG performance.
- Enhance ability to meet stakeholder and regulatory reporting requirements with transparency.
- Build strategies to integrate ESG considerations into decision-making and operational practices.

KEY COURSE HIGHLIGHTS

At the end of the course, you will understand;

- Industry-focused ESG frameworks and best practices.
- Practical exercises on ESG data analytics and visualization.
- Guidance on global reporting standards (e.g., GRI, SASB, TCFD).
- Case studies from leading oil and gas companies.
- Tools to align ESG strategies with regulatory and investor expectations.
- Insights into emerging trends in ESG reporting and performance management.

All our courses are dual-certificate courses. At the end of the training, the delegates will receive two certificates.

1. A GTC end-of-course certificate
2. Continuing Professional Development (CPD) Certificate of completion with earned credits awarded
