

Governance, Compliance & Cyber Law

COURSE OVERVIEW

The course offers a comprehensive understanding of the legal, regulatory, and organizational frameworks that govern the protection of digital assets and information systems. It covers the principles of IT governance, risk management, and compliance requirements while exploring global cybersecurity regulations, data protection laws, and industry standards such as GDPR, HIPAA, ISO 27001, and NIST. Delegates will examine the roles of policies, audits, and ethical considerations in ensuring accountability and transparency with the intersection of law and technology in addressing critical issues such as intellectual property rights, privacy, cybercrime legislation and cross-border jurisdiction challenges.

WHO SHOULD ATTEND?

This course is designed for IT managers, compliance officers, cybersecurity professionals, legal practitioners, auditors, policymakers, and business leaders seeking to strengthen their knowledge of governance and regulatory requirements in cybersecurity. It also benefits regular individuals aspiring to specialize in information security management, digital law, or corporate compliance, as well as organizations aiming to improve their governance structures.

COURSE OUTCOMES

Delegates will gain the skills and knowledge to:

- Understand the principles of IT governance and their role in cybersecurity strategy.
- Interpret and apply key global and regional cyber laws, data protection acts, and regulatory frameworks.
- Recognize the importance of compliance in mitigating risks and ensuring business continuity.
- Evaluate the legal and ethical implications of cybersecurity incidents and responses.
- Analyze cross-border legal challenges in cyber law and digital transactions.

KEY COURSE HIGHLIGHTS

At the end of the course, you will understand;

- The In-depth coverage of IT governance frameworks (COBIT, ISO 27001, NIST CSF).
- The exploration of global data protection and privacy laws (GDPR, CCPA, HIPAA, etc.).
- The case studies on cybercrime legislation and landmark legal cases.
- The insights into corporate compliance programs, audits, and reporting requirements.
- Practical understanding of legal and ethical issues in cybersecurity.
- Cross-border regulations and international cooperation in cyber law.

All our courses are dual-certificate courses. At the end of the training, the delegates will receive two certificates.

1. A GTC end-of-course certificate
2. Continuing Professional Development (CPD) Certificate of completion with earned credits awarded.
