

# Green Bonds and Climate-Linked Instruments for Energy Projects

## COURSE OVERVIEW

This course provides an overview of green bonds and climate-linked instruments for energy projects. It covers how these financial tools fund renewable energy and sustainable infrastructure. Participants will learn the basics of green bond issuance and key standards and also explore how climate-linked instruments connect financial returns to environmental goals. Market trends and regulatory frameworks will be also discussed to show how these tools support a low-carbon economy and climate commitments.

## WHO SHOULD ATTEND?

The course is tailored for energy sector professionals, project developers, financial analysts, bankers, policymakers, sustainability officers, and corporate executives involved in clean energy investment or infrastructure development. It is also valuable for regulators, legal advisors, and consultants seeking to understand climate finance mechanisms and their application in accelerating sustainable energy transitions.

## COURSE OUTCOMES

Delegates will gain the skills and knowledge to:

- Understand the fundamentals and market dynamics of green bonds and climate-linked instruments.
- Assess the eligibility of energy projects for sustainable financing.
- Design and evaluate green financing frameworks aligned with international standards.
- Identify opportunities, challenges, and risks in issuing and managing climate-linked instruments.
- Leverage innovative financing strategies to attract investors and scale renewable energy projects.

## KEY COURSE HIGHLIGHTS

At the end of the course, you will understand:

- Comprehensive overview of global green finance markets and regulatory frameworks.
- Practical case studies on successful energy projects funded through green bonds.
- Tools for structuring, pricing, and monitoring green debt instruments.
- Insights into investor expectations, ESG integration, and impact reporting.
- Interactive discussions and simulations on mobilizing climate finance for energy projects.

All our courses are dual-certificate courses. At the end of the training, the delegates will receive two certificates.

1. A GTC end-of-course certificate
2. Continuing Professional Development (CPD) Certificate of completion with earned credits awarded
