

International Power Project Finance and Cross-Border Energy Deals

COURSE OVERVIEW

This course provides a comprehensive framework of cross-border energy investments from conceptualization to execution. The curriculum examines how global financial institutions, multilateral development banks, and export credit agencies play critical roles in funding large-scale energy infrastructure. Participants will gain in-depth insights into international project finance structures, sovereign risk management, foreign exchange exposure, and credit enhancement mechanisms used in power projects. Through real-world case studies and practical simulations, delegates will have the ability to structure complex cross-border power deals, navigate financing instruments, and evaluate project bankability.

WHO SHOULD ATTEND?

This course is designed for energy finance professionals, investment analysts, project developers, legal advisors, policymakers, and executives involved in cross-border energy projects and power infrastructure financing. It is particularly beneficial for professionals from utilities, independent power producers (IPPs), financial institutions, export credit agencies, and government ministries seeking to deepen their knowledge of international financing structures, risk management strategies, and investment frameworks for global power projects.

COURSE OUTCOMES

Delegates will gain the skills and knowledge to:

- Analyze cross-border risk factors, including political, regulatory, and currency risks.
- Structure financing models using debt, equity, and blended finance instruments.
- Apply due diligence frameworks to assess project viability and bankability.
- Develop and interpret term sheets, financial models, and contractual frameworks
- Identify key stakeholders and align interests for successful project execution.
- Utilize financial modeling tools to forecast cash flows and evaluate project returns.

KEY COURSE HIGHLIGHTS

At the end of the course, you will understand;

- The fundamentals of international power project financing structures and mechanisms.
- How to identify and mitigate sovereign, credit, and market risks in cross-border deals.
- The role of development finance institutions, export credit agencies, and private investors.
- How to structure special purpose vehicles (SPVs) and partnership agreements across jurisdictions.
- Methods for evaluating foreign exchange exposure and currency hedging strategies.
- How ESG, carbon credit mechanisms, and green finance affect power project funding.

All our courses are dual-certificate courses. At the end of the training, the delegates will receive two certificates.

1. A GTC end-of-course certificate
2. Continuing Professional Development (CPD) Certificate of completion with earned credits awarded.
