Renewable Energy Policy, Regulation & Market Mechanisms

COURSE OVERVIEW

This course provides a comprehensive understanding of the frameworks, strategies, and market structures that drive the global shift toward sustainable energy systems. It examines the interplay between policy design, regulatory mechanisms, and market instruments that promote investment, innovation, and deployment of renewable energy. Participants will gain insights into international best practices, policy models, pricing schemes, subsidies, incentives, and emerging market mechanisms.

WHO SHOULD ATTEND?

This course is designed for energy policymakers, regulators, utility managers, project developers, investors, sustainability professionals, and senior decision makers who are engaged in shaping, implementing, or responding to renewable energy frameworks. It is also valuable for consultants, and professionals from the financial and legal sectors seeking to deepen their understanding of renewable energy markets and regulations.

COURSE OUTCOMES

Delegates will gain the skills and knowledge to:

- Understand key policy instruments and regulatory frameworks that support renewable energy adoption.
- Analyze the role of subsidies, incentives, and tariffs in promoting sustainable energy growth.
- Evaluate international case studies and best practices in renewable energy regulation and market development.
- Assess the impact of market-based mechanisms such as emissions trading and carbon pricing on renewable energy integration.
- Develop strategies to engage with policymakers, investors, and stakeholders for effective energy transition initiatives.

KEY COURSE HIGHLIGHTS

At the end of the course, you will understand:

- Deep dive into renewable energy policies, regulations, and global trends.
- Exploration of market mechanisms including carbon trading, renewable energy certificates, and green finance.
- Case studies of successful renewable energy transitions across different regions.
- Interactive discussions and scenario-based exercises to apply concepts in real-world contexts.
- Practical insights from industry experts, policymakers, and regulatory practitioners.

All our courses are dual-certificate courses. At the end of the training, the delegates will receive two certificates.

- 1. A GTC end-of-course certificate
- 2. Continuing Professional Development (CPD) Certificate of completion with earned credits awarded
