

Sustainable Development and Green Finance in Oil & Gas

COURSE OVERVIEW

This technical course delves into the intersection of sustainable development practices and green finance within the oil and gas sector. The course covers the role of green finance, including sustainable investment, green bonds, and renewable energy financing, and how these financial tools can support the transition to cleaner, more sustainable energy sources. Additionally, it addresses the implementation of environmental, social, and governance (ESG) criteria, sustainable supply chain management, and the regulatory landscape that influences the oil and gas industry's shift toward sustainability. Participants will gain an understanding of how the industry is evolving in response to global environmental challenges, focusing on integrating sustainable development goals (SDGs) into business strategies.

WHO SHOULD ATTEND?

This course is intended for executives, managers, and analysts involved in sustainability, corporate social responsibility (CSR), finance, and regulatory compliance. It is also suitable for investors, policy makers, consultants, and professionals from financial institutions seeking to understand the role of green finance in the energy sector. Individuals involved in risk management, environmental strategy, and sustainability reporting will benefit from the practical tools and insights offered in this course.

COURSE OUTCOMES

Delegates will gain the skills and knowledge to:

- Understand the principles of sustainable development and how they apply to the oil and gas sector.
- Assess the role of green finance in facilitating sustainable business practices and energy transition in oil and gas.
- Develop and implement strategies to integrate sustainable development goals (SDGs) into corporate operations.
- Navigate the regulatory environment and understand how policies influence sustainable investments and green finance opportunities.
- Measure, report, and manage sustainability risks and opportunities within the oil and gas industry.

KEY COURSE HIGHLIGHTS

At the end of the course, you will understand;

- Exploration of the UN Sustainable Development Goals (SDGs) and their application to the oil and gas sector.
- In-depth analysis of green finance instruments such as green bonds, ESG investing, and sustainable infrastructure financing.
- Practical case studies on oil and gas companies adopting green finance strategies and sustainable business models.
- Insights into the latest regulatory frameworks, including the EU Taxonomy and global climate finance initiatives.
- Opportunities for networking and interaction with industry leaders, financial experts, and sustainability professionals.

All our courses are dual-certificate courses. At the end of the training, the delegates will receive two certificates.

1. A GTC end-of-course certificate
2. Continuing Professional Development (CPD) Certificate of completion with earned credits awarded
